

Marker Buoy

Subsea America square marker buoys are rated for 3000M. The square design allows for ease of storage and shipping.

The new 2 hole design allows the user to tie a 3/8 inch Poly rope through the marker buoy and back to the rope itself. This allows the buoy to float straight up while also having a firm connection the clump weight.

The solid filled micro sphere design ensures that the marker buoys will not implode or leak. The unique acoustic signature allows the marker buoys to easily stand out in seawater.

Depth	Part Number	Uplift
3,000M /-10,000ft	3000-MBS	4.5 KG / 9.9 LBS
